Summary — I am an energetic and ambitious web developer with a passion for creating innovative and efficient web solutions. With expertise in full-stack development using .NET, MERN, and Flutter, I approach every task with responsibility, ensuring high quality and attention to detail. I excel in both individual and collaborative environments, consistently delivering results within deadlines. My experience spans developing user-friendly interfaces and building robust backend systems, with a focus on scalability, responsiveness, and user experience.

Skills

Frameworks	.NET, React, Vue.js, Flutter, MERN, Laravel	**Version Control**	GitHub
OS	Ubuntu, Windows	**Back-end**	Node js, PHP, ASP.NET, Laravel
Languages	Python, Java, C#, TypeScript, JavaScript, PHP	**Database**	MySQL, MongoDB, Firebase

Experience

Weblook International Private Limited **Jun 2025 – Present**

Associate Full Stack Developer

- Enhancing and maintaining a robust multivendor marketplace platform using Vue.js and Laravel, ensuring scalability and performance across modules.
- Implemented seamless order placement and quick checkout workflows, optimizing user experience and reducing cart abandonment.
- Developed dynamic quick view functionality for products, improving customer engagement and boosting conversion rates.
- Built vendor-side order acceptance features, enabling real-time order confirmation and status updates for marketplace sellers.

Weblook International Private Limited **Mar 2025 – Jun 2025**

Trainee Full Stack Developer

- Developed a comprehensive multivendor marketplace platform using Vue.js for the frontend and Laravel for backend architecture.
- Implemented advanced Vue.js components with reactive data binding, state management, and responsive UI/UX design.
- Built robust Laravel APIs with authentication, authorization, and database management for a multi-tenant architecture.
- Designed and optimized database schemas for vendor management, product catalogs, and order processing systems.
- Integrated payment gateways, inventory management, and real-time notifications for seamless marketplace operations.

Headstart Pvt Ltd **Mar 2023 – Mar 2024**

Software Developer Intern

- Enhanced application functionality with PHP validation and CRUD operations using CodeIgniter.
- Optimized WordPress sites, customized themes/plugins, and ensured responsive, mobile-friendly designs.
- Designed user-friendly, visually appealing UIs for web and mobile using HTML, CSS, and Flutter.
- Created advanced, responsive Flutter applications with complex widgets, animations, and Figma prototyping.
- Delivered front-end and back-end solutions, ensuring cross-platform compatibility and performance.

Education

London Metropolitan University **Feb 2024 – Feb 2025**

BEng (Hons) Software Engineering - Top-up

Institute of Technology University of Moratuwa **Mar 2020 – Dec 2024**

National Diploma in Technology in Information Technology

V/Vavuniya Tamil Madhya Maha Vidyalaya **Jan 2014 – Aug 2018**

Secondary Education

Projects

Student Management System **Dec 2024 – Jan 2025**

- Designed and developed a Student Management System using Laravel, ensuring scalability and maintainability.
- Implemented CRUD operations for managing students, teachers, batches, courses, payments, and enrollments using Laravel.
- Tested and debugged the system thoroughly to ensure smooth functionality and resolve issues effectively.

ASP.NET MVC Web Application for E-Book Sales Management System **Sep 2024 – Dec 2024**

- Developed an ASP.NET MVC e-book sales management system using C# with a focus on object-oriented design principles.
- Designed customer registration, login, order management, book search, and a feedback system for logged-in users.
- Provided comprehensive installation and configuration manuals for easy application setup and deployment.

Car Dealership Management System: Admin and Customer Portal in C# **Jun 2024 – Sep 2024**

- Developed a C# car dealership management system with an object-oriented approach to handle cars, car parts, customers, and orders.
- Created custom classes for entities like Car, Car Parts, and Customer, with robust CRUD operations and persistent data storage solutions.
- Implemented secure login features with role-specific access for Admin and Customer users.

MERN Stack Development for Taxi Reservation System **Jul 2024 – Nov 2024**

- Developed a web-based taxi reservation system using React, Node.js and MongoDB with responsive UI for web and mobile.
- Implemented passenger and driver registration with email confirmations, taxi booking, SMS notifications, and manual booking for unregistered passengers.
- Developed driver availability status, Google Maps API integration for nearby drivers, and a driver rating system.
- Enabled real-time interaction between passengers and drivers using Socket.IO.

Modules

- Project Management
- Software Engineering
- Software Testing & Quality Controlling
- Application Development
- Human-Computer Interaction
- Database Management Systems
- Computer Networks
- Cloud Computing
- Artificial Intelligence
- Operating Systems
